

## MAPPING THE MAZE

### *Call for Evidence*

AVA, in partner with the Agenda, the alliance for women and girls at risk, are delivering a project to map current service provision for women facing multiple disadvantage in the UK. In order to do that we are first conducting a literature review to determine what the core components of a gender sensitive service should comprise.

To this end, we would be very interested in receiving any internal/unpublished or published evaluations you may have relating to your service provision with women.

We are specifically looking for evaluations of services for women 18+ facing one or more of the following issues: **homelessness, substance use, criminal justice system, mental health, involvement in prostitution, violence and abuse.**

We are interested in evaluations discussing service delivery for women in terms of any of the following:

1. Organisation structure/philosophy
2. Staff skills and competences
3. Programme components
4. Implementation guidance

If you think you may have something which fits this bill and happy to share with us, please send to [jennifer.holly@avaproject.org.uk](mailto:jennifer.holly@avaproject.org.uk) by August 5th 2016.
